6/88

286/10 SPECIFICATIONS

CPU/MEMORY:
- 80286 16-bit microprocessor
- 6/10MHz user selectable
- 0 wait states
- 13.3MHz LANDMARK throughput rating

- Slot available for 80287/10
  math co-processor

- 640KB RAM expandable to 1MB RAM
  (on motherboard)

- AWARD BIOS
- Set-up utility in firmware

STORAGE:
- Five half-height drive slots:
  2 hidden and 3 exposed

STANDARD:
- 5.25" 1.2MB floppy disk drive

OPTIONAL:
- Second floppy disk drive:
  5.25" 1.2MB or 360KB;
  3.5" 720KB or 1.44MB

- Up to two 5.25" internal hard disk
  drives: 20MB, 40MB, or 80MB capacity

DISPLAY
COMBINATION
OPTIONS:
- HERCULES Graphics Card Plus with
  RamFont and parallel port
- 14" diagonal high-resolution,
  flat-screen green/amber phosphor
  monitor with tilt and swivel base
- 720 X 348 resolution
- 80 X 25 lines

- PARADISE Enhanced Graphics
  Adapter (EGA)
  with autoswitch feature
- 14" diagonal high-resolution,
  EGA monitor with
  tilt and swivel base
- 640 X 350 resolution
- 80 X 25 lines
- 16 colors

(more)

                          - PARADISE Video Graphics Array (VGA)
                            14" diagonal high-resolution,
                            multi-sync analog monitor
                            with tilt and swivel base
                          - 800 X 600 maximum resolution
                          - 80 X 25 lines
                          - 256 simultaneous colors

INTERFACES: - RS-232 serial port
                          - Centronics parallel printer port
                          - Game port

EXPANSION SLOTS: - Eight full-length slots
                            (two 8-bit; six 16-bit)
